access

KeyBox Basic.
Smart solution for simpler needs.

The Basic series is based on simplicity and security. The key cabinets are equipped with a keypad for entering codes and programming. The key cabinet has a small green diode above the keypad that indicates that the cabinet is active and blinks faster when it is in service mode. The key cabinets are available in various models with 16, 29 or 216 key hooks or, alternatively, with 6 small compartments.

All key cabinets can be expanded using Expansion cabinets, by up to 15 cabinets in any combination. This means that there can be 96 compartments in just one key management system, which are all controlled via just the one keypad.

Models for Basic.

9001 B
Basic series with 1 door and
29 key hooks.
External dimensions:
350x280x85 mm
Weight: 5.3 kg
